**The Law Of Maritime Boundary**

Maritime Zones and Boundaries. The maritime zones recognized under international law include internal waters, the territorial sea, the contiguous zone, the exclusive economic zone (EEZ), the continental shelf, the high seas and the Area. The breadth of the territorial sea, contiguous zone, and EEZ (and in some cases the continental shelf) is measured from the baseline determined in accordance with customary international law as reflected in the 1982 Law of the Sea Convention.

**The Law of Maritime Boundary Delimitation: A Case Study of ...**

Maritime zones are drawn using what the LOSC calls “baselines.” Unlike inland waters, coastal waters rise and fall in tides. Rather than having moving maritime boundaries, the baseline is fixed to begin at the low-water line along the coast. The low-water line is derived from the coastal State’s own charts.

Maritime boundary treaties are treaties that establish a specified ocean or sea boundary between two or more countries or territories. These are also called maritime boundary agreements, maritime delimitation treaties, or maritime delimitation agreements.

List of maritime boundary treaties - Wikipedia
A maritime boundary is a conceptual division of the Earth's water surface areas using physiographic or geopolitical criteria. As such, it usually bounds areas of exclusive national rights over mineral and biological resources, encompassing maritime features, limits and zones. Generally, a maritime boundary is delineated at a particular distance from a jurisdiction's coastline. Although in some countries the term maritime boundary represents borders of a maritime nation that are recognized by the...
